Project failure

OVERVIEW

This project is to locate the things that came out of the respawn machine and eliminate them at conagher's slaughterhouse and we will get money back to us after each failure is killed and will donate their organs to hospitals (make sure the organs work and have no side effect from the machine). We also need no photos being taken unless the photo being taken is someone who works for or is jules archibald.

GOALS: Eliminate the failures.

SPECIFICATIONS: Each time we get paid we will donate it to the jules archibald foundation and we will be able to experiment on them at the slaughterhouse and find out why they are deformed but not find out how it happened, We also will have a guards to hire there to shoot any trespasser.
